Principal’s Message

“What makes MSRCASC unique?”

“Why is it that many outstation alumni make it a point to include MSRCASC part of their itinerary when they visit Bangalore?”

My one word answer to these questions is “community”. We have students who came back to invite us for their wedding and drop in with their spouse and children whenever they come to Bangalore.

The MSRCASC community extends all around the globe. It is what unites us, gives us a common bond, a shared heritage, a link to the Garden City-Bangalore. Age, gender, nationality and profession – they all become seamless and when we get together, we not only reminisce of former days, but also appreciate and admire the people we have become!

We have grieved together, laughed together over all those jokes and memories. It has united us-world over. And so looking ahead, what does the future hold?

Here are a few questions to ponder upon:

- Can we together support financially at least one deserving student of MSRCASC and sponsor his/her college fees?
- How best do we facilitate and encourage class reunions when alumni are scattered across the globe.

This second news letter from the alumni association is written in two parts. Part A includes a few mails we received from some alumni in the past two months. Part B gives a list of alumni who are in contact with us. This list is not exhaustive but we hope that with more re-unions we would connect better. Do keep in touch and let us know about your MSRCASC friends. And of course, we would love to see candid snaps of your get-togethers.

As we try to revitalize the MSRCASC Alumni Association we hope you will remember with nostalgia your alma matar- your home.

It is my great privilege to welcome alumni to this get together. I want you to know that you are always welcome to visit MSRCASC. You are our best ambassadors.

I record my appreciation to the many staff members and students who have helped to compile this brochure together. I also thank the MSRCASC management for their continuous and generous support.

God Bless you,

Till next time,

With kind regards,

Sakuntala Samuelson
prinicpal.msrmasc@gmail.co
Memories of college life are always enjoyable. They are memorable. We hope to make more fruitful contribution to our college this year, 2010-2011 to strengthen the organization with God’s grace. The NAAC has accredited our college with an ‘A’ grade. The success is dedicated to all those who are connected to the college & the IQAC team.

MSRCASC is proud of SONA RAAJ of BSc (Electronics/Maths/CSc) who has been placed at 7th university rank among students of all the colleges affiliated to the Bangalore University in the BSc stream in January 2010.
The college experience is a transition from youth to adulthood that one has to undergo. It presents many challenges and opportunities. One of the challenging aspects of Ramaiah College, in the social arena, is the mixing together of people from many diverse backgrounds.

Along with academic progress, we were encouraged in projects, games and athletics, arts and craft, dance and various other activities. These make the college days interesting and memorable.

Proper initiative by the lecturers and excellent library facility has helped us in improving the views and expressions and raising the standard of our knowledge.

Looking back on my two and half years as a student of M.S.Ramaiah College, I can see a spectrum of growth and self realization that has been unlike any other that have experienced. I had broad expectations for my education: wanted to expand my horizons, also feel extremely happy that I was able to find a college, which aided my self development.

Inside the classroom. I have learned how to form and articulate my interests and opinions. My class work has given me a strong academic background. I have developed important skills in my chosen areas of study and have also allowed me to explore various other areas of interest.

College Magazine is a historical document on the growth of college. It informs the future generation of students about the traditions built in their college and we are very fortunate to have one such magazine of our college.

Finally, I am grateful to M.S. Ramaiah College, Principal and Staff.

Thanking you,

Megha Jagatap
MSc. (Bio-chem) Batch 2008-2009

Whatever we expected with confidence becomes our own self-fulfilling prophecy

I completed my MSc Biotechnology from MSRCASC in July 2009 and joined my professional career in August 2009. I am working for an international environment project called I.S.S.U.E as a Technical Specialist. The project is going on in 15 Countries across the globe. My employers are WASTE, Netherlands and MSSS, Bangalore (partners for the project). We mainly with integrated Solid Waste Management Systems and Ecological Sanitation in both rural and urban areas.

MSRCASC has played a pivotal role in shaping my career, over the last two years. It was here that I realized what I ultimately want to pursue in my career. My college has supported me thoroughly in each and every endeavor I took up.

I was encouraged by my Professors in Department of Biotechnology to participate in the Intel Environment Research Contest 2008 with my project proposal- “Strengthening Solid Waste Management Systems on M.S.Ramaiah Group of Institutions’ Campus.” With the full support of my teachers and friends we won the zonal finals of the event (college category), and a sponsorship of Rs 75,000/- from Intel India for the project. I could say that this was a turning point in my career.

MSRCASC further supported me to conduct a Research Project on “Effect of Lead toxicity on fish and people consuming fish along the Ganges area of West Bengal.” It was done in collaboration with ‘National Referral Centre for Lead Poisoning in India’, (NRCLPI, Bangalore). I am grateful to my college for
bearing half of the project cost and the other half was sponsored by Quality Council of India, New Delhi. My teachers have guided me with sound knowledge of every aspect of my subject. The best thing about MSRCASC is that education is not restricted to classroom teaching. We have been encouraged to take up short term projects in college, work for publications, and technical seminars and presentations. Professors in the Department of Biochemistry had also supported me to take up a short study and do scientific presentations on “Nicotine addiction” in several inter college events. Professors in the Department of Biotechnology guided me to give scientific presentations on “Nanotechnology- in drug deliver”, in National and International Seminars.

In spite of being a Post Graduate student I was still encouraged to participate in co-curricular activities (painting, debates and theatre) for inter college fests. I am really thankful to the college for helping me with the ‘attendance’!

I take this opportunity to thank four other who have thoroughly encouraged me in each step- Mrs. Shakuntala Samuelson (principal), Dr. Pruthvish (H.O.D. Ramaiah Medical College- My project guide), Mr. Adhip Chaudhuri (C.E.O) and Mr. Kodandaram (Director).

I am grateful to all my teachers who have been a wonderful source of inspiration. I should thank my amazing group of friends and juniors who have been beside me in every aspiration!

My message to the present students who complain, “Nothing happens in this college”, would be “AEISE AWAKE ASPIRE…opportunities are right beside you…go grab it!”

Three cheers to my ALMA MATER! Thanking you,

Namrata Sengupta
(MSc(BT)Batch 2007-2009)

TWO NOSTALGIC YEARS

“Behind every successful man there is a women”- as the saying goes, behind every successful individual there are his/her parents and teachers. Yes, being a student of MSRCASC, has proved a great difference to me.

The two years of post graduation in this college has thought a lot of things to me. More than anything ,the lecturers in this college encouraged me to put forth my talents in all fields. Apart from my academics there was a strong back up for me to venture into new fields. It is the confidence of the lecturers in me that boosted confidence in myself to achieve anything I wanted.

The environment, the individual attentions showed on each one of us; those encouraging talks of being independent and aiming to reach heights were some of the things which were taught to us from the beginning and which were to become the most exhilarating moments in the years to come. Doing my P.G course has helped me reach great heights. I am identified wherever I go ,knowing that I graduated from this college.

To add to the success of my college days ,I was a topper in my first semester Msc. (Biochemistry) and today I am proudly placed as an Associate Clinical Data Coordinator at Quintiles Technologies . The status that I am presently enjoying is invested by this college.

My heartfelt love and sincere thanks to all my lecturers in this college. I am proud to have been a student of this esteemed institution.

Archana. K.S and Megha
(Msc( Biochemistry ) Batch -2007-2009 )

Archana is working at Quintile Company and Megha is working as a System Analyst.
Role of MSRCASC in moulding my life and career

The college days were the first time; I was away from my parents and near ones; and started managing things my own. I started to realize the real facts of life and I felt like a butterfly just came out of its pupa stage. Many times my decisions made for day to day issues went wrong but they made me good lessons and guided me in the right. Though I couldn’t attain the outstanding in my education level, the knowledge and disciplinary that I got from MSRCASC helped me in shaping up my career as a Senior Software Developer of reputed organization like Hewlet Packard. Even MSRCASC has got a major role in my personal life too. I met my life partner for the first from the campus. All the way there are a lot memories and support from the campus for makeover of the existing ME.

I would like to take this opportunity to thank all my TEACHERS & FRIENDS who are with me as a Role Model, Supporter and Guide which lead me to have a successful life throughout.

Jogy Susan Varghese

Role of MSRCASC and its teachers in my life

“Teacher: The child’s third parent.” I love my teachers. Most of my teachers did not try to identify winners: they tried to make winners out of ordinary people. They did not only teach the academic lessons; they taught us how to live.

In MSRCASC, I spent the most colorful days of my life. From the first day introduction class, till the last day afternoon see off in the canteen; we used to study, play, laugh, talk, sing, dance, fight...sometimes wrong sometimes right. The long and short of it is, we were bounded by an eternal bond of teachers, friends and books and so on. We carried on the torch lit by our teachers and we followed in the footsteps of our seniors and we left behind our footsteps for pupil of neo era to follow.

Role of MSRCASC in moulding my life and career

It has been a decade now, but still feels like it was just yesterday. Fresh out of high school, wide-open eyes full of dreams and heart soaring up high, I left my hometown in Kerala to study computer science at M. S. Ramaiah College of Arts, Science and Commerce (MSRCASC). Whoever I told to that I was going to pursue my studies at MSRCASC was highly impressed. They all were of the opinion that I had made
the right selection as it was the best college to get education from in Bangalore. As I stepped into the college, I knew why.

After the first few days that I took to get adjusted to my classes and getting to know the lecturers and my classmates, my journey through the three years for a Bachelor’s degree was an experience that I will cherish forever. We were a class of about thirty five students. It was amazing to see students from all across the country come to study here. Being from different parts of the country stretching from Kashmir to Kerala and Gujarat to Assam, and then some in between; we were all so different from each other; and yet so similar. We were all a bunch of dreamy tweens eager to explore, learn and conquer! Each and every one of my batch mate was special in their own unique way and getting to know them and spend time with them was an extraordinary experience. Of course, eventually, I started mixing more with some than others and we became very good friends. I remember hanging out most with Baburaj, Shaheen, Aleesh, Priyanka and Punam. The friendships made in these three years will last me a lifetime. The lecturers of the college were the most patient and proficient teachers I have ever come across (they actually managed to create an interest in me, who would rather do anything else than study, for their respective subjects!). Heading the talented team was our department head, Mrs. Kanakavalli. Her strong and powerful demeanor kept us all in awe. No matter how misbehaved, with her in the vicinity, all of us put up our best front. Without a doubt, she is teacher extraordinaire. She has the secret to keeping students engaged in the subject and interested. With her motherly genuine concern for each and every one of us, it is difficult not to have reverence for her. Like every kid, since my childhood, I too had a dream. Every time I would see a plane tear through the clear blue sky, I knew what I wanted to be. MSRCSAC and the lecturers of the college showed me the path to be where I wanted to be. Without their constant guidance and perseverance for student excellence, I would probably not have been where I am today. They helped me fulfill my dream. Today I am a pilot with the Kingfisher Airlines Ltd and I am ever so grateful to the college and all that it had to offer. Every experience there taught me something that brought me closer to achieve my dream. I feel proud to say that all of my friends and batch mates are extremely well placed today, lighting up the world with the light that was ignited in each one of us by this college, MSRCASC, through its professors, each of who is par excellence. I, on behalf of all my batch mates would like to take this opportunity to thank you, MSRCASC and our esteemed lecturers, for opening up the world to us through imparting knowledge, the most noble deed of all.

**Capt. John Lewis**
(BSc (Elec) -Batch 2000-2003 )

This is Ashok S 99 batch BSc. We were the second batch of MSR degree college. I am a regional Business Manager in celon Laboratories Ltd it’s a pharmaceutical company based at Hyderabad and into manufacturing of innovative chemotherapeutic agents for various cancer. We strive to provide the best quality products to all our patients with a affordable pricing as cancer treatment is very expensive. I am taking care of Karnataka and AP marketing operations. My wife Rashmi is Senior Staff nurse at Columbia Asia Hospital yeshwantpur and recently returned from Malaysia and Bhuvan my 6 yr old son is studying in 1st STD at MMKV school. Achivements 1.I was felicitated for best performance in Malaysia for the year 07-08 and again in Thailand for the year 08-09. Then got promoted as a Regional Business Manager in oct09. 2.Recently constructed a House in Bangalore.

I thank M.S.R.C.A.S.C and have guided in the right path

**Ashok S**
(BSc (Batch 1999-2002))

Presently working as a regional Business Manager in celon Laboratories Ltd
What did I achieve?

I proudly acknowledge that M.S.R.C.A.S.C has been a great support and have guided in the right path and right ways to move forward successfully in my life.

Anyway, the big question on everyone’s mind who is reading this would be, what did you achieve? I Interrogated myself I found my hidden talent in terms of academics, sports and cultural. Principal and all the staff members were a great support and played the vital role in shaping my career. When I was chosen to be a member of “Science Student Society” and work for the inter collegiate fest “INFERND”, I was glad and more than happy, through that I learnt how to organize and bring things to our hand. I gained more confidence and became more determined. Personally, I thank M.S.R.C.A.S.C for molding me successfully. I thank Principal, all my staff members and my dear friends for being integral part of my life during the three years.

Franklin Francis
(BSc (Elec)-Batch 2006-2009)

Role of MSRCASC and its teachers in my life

Education is what remains after one has forgotten when one has learned in school. It is a miracle that curiosity survives formal education and…. Leaving home and starting college in M.S.R.C.A.S.C is a major life transition for students and parents. Communication issues and how to set healthy expectations was the main question in the mind of the students but the faculties made it an easy one for them. Pupils from a multitude of backgrounds together, came to learn the ropes of the industry and develop them into full-grown professionals. M.S.R.C.A.S.C give us a platform to grow and nurture myself ourselves to be where we are today. M.S.R.C.A.S.C is the catalyst that enabled us to be the person we wanted to be. Its value was not just the qualification but the opportunity to broaden one’s horizons, meeting and sharing experiences with a diverse group of people by attending the fest in other colleges and provides a perfect blend of practical and theoretical knowledge. The education in the classroom and in the practical class provided us with rich and applicable experiences.

All faculty members were very encouraging and supportive. Most of the faculty members were very experienced. We received the full support and cooperation of the faculty members in solving all the problems. We were encouraged to participate in several events. M.S.R.C.A.S.C delivered more in terms of culturally diverse student’s community, extra curricular activities and lots more. Here, not only students developed strong academic skills and habits, but they also learned how to manage time, maintain health and wellness, get involved in campus and community life, and respect and appreciate diversity. The practical classes aim to encourage students to continue to study and pursue a career in science and create job opportunities to help fill the skills shortage that persists across the science industry.

(BSc (BT)- Batch -2006-2009) Presently pursuing MBA

Role of MSRCASC in moulding my life and career

RAMAIAH is the place where I lived my life to the fullest. These 3 years of my life are the most precious days of my life. I learnt basic principles of life, made friends from every corner of our country and abroad and even developed my skill of communication.

The rewards of my college are immense which cannot be explained in an article but can be felt in every aspect of my lifestyle. I, after coming from my hometown 3000 miles
away, was in a dilemma whether to join the college or not, in a place that was completely alien to me. But I am happy with my decision of joining Ramaiah Institution for my graduation, which is a community of diverse culture.

The people are very nice, interactive, helpful and friendly. Not only this, the college provided us with a proctor who was always there with us and was like our guardian. The proctor sort all our problems whether if might be personal or any other.

I owe a lot to this college. Teachers, friends and everyone associated with Ramaiah and I know I can’t pay back for all these I gained here. But I assure I would always stand by the college whenever wanted. I enjoy immense pleasure to announce that I am a part of this college and is a life time alumni of this college and will be associated with the college for ever.

Lastly, I want to add that ‘I am Gone Miss My College Days’. But I have miles to go before I sleep, and this is how I console myself.

Ankit Podder  
(BSc (BT)- Batch -2006-2009)

A Journey down the memory lane

While planning our 2009 vacation to India, we made a sudden plan to make a short visit to Bangalore. We were neither very apprehensive, nor hopeful, as we assumed most of our friends and lectures would not be there. The moment we stepped inside the MSR College of Arts, Science & Commerce campus, we were completely awestruck and nostalgic. We both joined the college in 2000. Myself, Punam, for B.sc Biotech came all the way from Kolkata and my husband, Shaheen for B.Sc Computer Science came from Kerala. We obviously didnot know each other. The very 1st time I saw our then-H.O.D. of Biotech+Genetics, Ms. Neetha, I could not understand if she was a fresher getting ‘ragged’ by the seniors or a teacher communicating with her curious students, as she was almost ‘encapsulated’ by her pupils!

After joining MSR college, as I got over the preliminary bout of home-sickness, I started to enjoy the new-found independence. I started liking the college campus minus the ‘intro’ to the seniors! And not to forget Ms. Neetha’s classes. She was one of us, having fun with us and making us study as well! We used to have morning classes for English, which we shamelessly used to bunk! I was famous for my ‘early to bed & late to rise’ quality. I hate to admit it that I used to.. call it daydream.. or call it sleep with my eyes open during chemistry classes, which completely changed when Dr. Shakuntala took charge of our chemistry classes. I heard from an anonymous source that she is dangerous, so better keep your mind-eye open and your day dreaming shut for that 45 minutes. After she took the 1st session, we were laughing clutching our stomachs.. none of us noticed that we finished one chapter already! After that I never slept during her classes. We had Prasanna Kr, and Dr. Raghav for Chemistry, Pushpa ma’m, Hemlatha ma’m, Kavitha ma’m for Microbio, Dr. Shantha(our new H.O.D.), Mr. Santosh for Biotech, Ms. Neetha for genetics, Lalitha ma’m and Padmalochana ma’m for Additional and General English. Its obviously for those who are by now curious how this ‘Kolkata met Kerala’ happened, its the magic of General English class, where ‘Cupid’ was highly welcomed and all the B.Sc departments who had the subject english had this class together. Even if we had low attendance in others, general english class had an overwhelming amount of students for obvious reasons! Valentine’s day was unofficially announced festival ! As for our ‘chemistry’, the college cultural programmes played as Active catalyst too!

I must mention that I have achieved quite a lot of best things of my life here, my best-half, my best friend Priyanka Banerjee, the best singer award in Inter college competition, best of lecturers and the very best time of our lives. We never realized that when the transition from ‘liking’ the college to ‘loving’ the college happened!
As we look back to our college life now, it looks amazingly beautiful. We actually spend a part of our free, leisure time to retrospect the old days... the tensions for exams, the practical book writing just before days of exams, the hostel life, the fun at the campus, the college programmes, the saraswati puja with all of us girls wearing sarees, the auto rickshaws, the Kaveri theatre, the whole Ramaiah Nagar area surrounding our college... everything about Ramaiah College is still magical to us. We left MSR in 2003 and were married in 2006. And after all the years, when we visited this time, the college, infact the entire place had somehow preserved the same old magical charm. We were highly welcomed by our principal, Dr. Shakuntala to whom I had confessed about my chemistry class incident.. vise-principal Dr. Kanagavalli, H.O.D. Microbio Dr. Pushpa, Chemintry lecturer Mr. Prasanna Kumar, PUC principal Mrs. Deepthi, the office staffs, some students in the campus quite curious of our presence.. all of them. We are very glad to visit everyone with our son, Ayaan and we want all of you to know that we are very proud of our alma mater, M. S. Ramaiah College of Arts, Science & Commerce.

Punam & Shaheen

Role of MSRCASC and its teachers in my life

My batch mates were the best I could ever get. Our 3 years of studies in this college was the most memorable part.

The college had encouraged me in all my works which led to great achievements. They played a major role in shaping my future and career. We had achieved enough to make this college have a marked on the map. Our event such as INFERNO'09 was a major cultural fest that was a remarkable hit in the history of our college.

Our teachers and the management is will always remain as the crown jewel of this college. Studying in this college is like a dream come true and I am proud to be an ex- student of this college. I always hope the love and encouragement by our teachers continue as more number of achievements is gained by the students going beyond anybody’s imagination.

Thanking you,

Janardhan
(BSc-(BT) -Batch 2006-2009)

B.C.A

“Role of my college M.S. Ramaiah in molding my character”

The mention of the name of my college M.S. Ramaiah always fills me with pride and I never miss the opportunity to say I studied in MS Ramaiah. I am Gitanjali Kahaly and today as you read through this article I will give you a glimpse of how I changed from a very shy person to a very confident person.

It was in the month of September when I left the comforts of my home in Guwahati and came to Bangalore to pursue my bachelors degree in Commerce. It was a rainy dull day when I said my goodbye’s to my parents and wiping my tears entered into a new life I was now a resident of the MS Ramaiah hostel for girls.

The first few months were the toughest in my life I was homesick most of the time, also in this time
I had to shift from BCom to BCA, this change in course taught me that anything can happen in life and we have to adapt to the change and make the best of it. BCA was something very new to me, I liked the computer but it was only to watch movies and play games. I had to learn the in and out of programming and with each passing day I began liking what I was doing.

The teachers and friends of Ramaiah were the ones who played a huge role in making me what I am today. The teachers taught me to be more confident and made me understand how important education was in moulding an individual, they made learning easy and fun and I was soon comfortable with the different subjects. The friends I made in Ramaiah were my guide and philosophers and even till this day I take their advice and make many of my decisions. I still remember that I never had to buy any books during my college as my seniors would always give me their books and they also helped me with notes and were always ready to help me understand tough topics.

The persona of the college was such that it implanted in me the wanting to be the best and with each challenge or difficulty that came my way I grew stronger and better in whatever I did.

During the first year in college I also got a chance to go for an inter-college dance competition, we had all practiced for over a month and this helped me lose my stage fear. Each day we practiced for two hours and then the day came when we had to perform. Our hard work had paid off and we won the competition. Here I learnt there was nothing like hard work and if one worked hard and sincerely they would always win in life.

A year went by and I was a senior now in the second year of my degree, I could see new people fresher’s as we called them. Many were just like me just new to the hostel life. Few of them soon became good friends and I was now the one teaching them about all that I had learnt in the year that had gone by. This is when I learnt the we need to help people when they are in need and helping them makes us a better person.

With new subjects and many many friends the second year in college was a great experience. Soon came third year and we were all ready to get a Job and some were preparing themselves for higher studies. I wanted a Job because a Job could give me the freedom that I always wanted. I studied well and my teachers taught me how to face an interview and got me ready for yet another challenge.

This year was coming to an end and then came the Campus interviews, my first company was iGate. I was very tensed that day as it was my first interview but with all my teachers had taught me I sailed through the interview smoothly. I had my first offer letter but there was a better opportunity knocking. It was the IT giant IBM we had gone for a pool campus and here I was victorious and got my next offer.

The last few days in college was really fun but as it came to an end it left us all sad it was time to say goodbye to my friends and to my college. The college which made me what I am today.

Gitanjali Kahaly
(BCA- Batch 2004-2007)

Role of my college M, S. Ramaiah in molding my character

MSRCASC helped in moulding my career, by providing a platform where I got a lot of exposure to lot of new technologies in IT through the experienced staff.

Alamelu R
(BCA - Batch 2003-2006)
Presently working in Accenture, Bangalore
Role of MSRCASC in moulding my life and career

Well I still remember the time when I was in MSRCASC. I was in 5th semester at that time. All of my batchmates were worried about the placement. The main concern was whether Companies are coming for placement? If yes, then Are they coming to our college? After few days we came to know that I-Gate is coming for placement in engineering college and is interested in recruiting BCA graduates too. That was the first good news we got regarding placements. Then we came to know that MindTree, IBM, WIPRO all are interested in recruiting BCA graduates. What I want to convey is that its because of our MSRCASC only, that we are here at this stage and able to write this trivial testimony about our college. I am very thankful to my college for facilitating us the opportunity to start our professional career so soon. I would like to highlight one more point that all the faculties, HOD of our Computer Science Department helped us, supported us, nurtured us and honed us to take up challenges to become a successful Professional. I personally Thank them, It was not possible without all their’s support.

Pratik Saket
(BCA- Batch 2004-2007)
Presently working for Wipro Technologies

Role of MSRCASC in moulding my life and career

Career means profession, which we want to adopt for earning livelihood, and planning means proper flow or to make proper decisions. Pre-planning in our life plays very important role in every aspect of life, to work in a proper flow, and pre-planning for career, which we want to pursue in our future ahead after acquiring certain level of degree is also very necessary in today’s competitive world. MSRCASC has helped to realize my dreams, work towards achieving my goal and making me more confident in whatever I do. I have learnt that success comes from failure...if we dont fail, we dont realize the importance of it in our life. I am happy to be a part of MSRCASC and get my education from one of the premier institution of India. Thank you for moulding my life into what I wanted to be.

Priyank Almal
(BCA- Batch 2005-2008)
Presently working as Junior Programmer Analyst, Mindtree Ltd.

Role of MSRCASC in moulding my life and career

First of all I would like to thank each and every member of the college, starting from the security guard who used to stand at the college gate and interact with all of us, clerks who collected our fees by making us stand in long queue 😊. Our Teachers, Placement officer, PT sir, and finally our principle. Without the mention of the people above, I would have not reached where am there today.

Thanks to each and every one of them.

As per my Experience in college for the three years that I studied here… It was a fantastic Experience in College. I could do everything that I wanted to do before joining the college. The most funniest was the bunking of class 😊. roaming around with friend, chitchatting, shouting and hell lot of enjoyment.
But on the other hand, we studied too..

Assignments, tests, Internals, night out during Exam. 24hours of study during Exam...Oh my God... not possible now..

The credit for making us write assignments and Internals and tests throughout the college life goes to our beloved teachers... without whom we would not have been where we are today...

The most Important and unforgettable moment in college was the day when I got two offer letters in my hand…. One from "Mindtree LTD" and the other "iGATE"… and had to choose one… 😊😊😊. This was possible only because of our placement officer… Thanks a lot sir.

On the whole, I enjoyed my college life, in terms of study, in terms of career building and also the so called college life… Enjoy…madi…

Piyush Khetan

Presently working as a software developer.in Mindtree LTD

Role of MSRCASC in moulding my(your) life and career

“Mould the pot when it is at right curve!”. This is a simple line that has been said by an anonymous, but made a right statement in my life. Was hassle free and on cloud nine leading my life without a thought of what’s going to happen in the future. Then is when i had an issue with the university regarding my Marks Card. Lost hope in life and was dejected, thought then i have been into the worst circumstance of life. Then is when Mr. Raghavendra Bhat the ex-Principal of MSRCASC and Mr. Vishwanath Kulkarni the FDC of MSRCASC. Who made me realize what is life? They gave me the mental support to face the challenges and guided me in the path to excellance. These two gentlemen are my God Father in teaching me to achieve. I take this oppurtunity to thank Mr. Vishwanath Kulkarni who is still showering me blessings and is still in touch with me in my progress. When i visit the college and i see him, I feel that he is God sent to save me. My Hod Mrs. Pratibha who guided me in times of decision taking in International certifications and helped in the consequences of interview facing. Today am a proud owner of 2 e-portal companies and not there to stop am an Corporate Trainer Manager of a Corporate Training Company. All these were acheived in the temple of built by the Late Shri. Dr. M S Rammaih. I takes me proud when i pronounce at place the institution that i studied out of..!! Thanks to the rest of the faculties and other members whose name i have not mentioned. Lack of time and space..!!

Role of MSRCASC in moulding my life and career

“The day I joined new & better things started happening in my life. It would have happened by dint of our Principal Sir, HOD of Computer Science Dept., our all scholar faculty members, staff, my friends & the utmost ambience of the The Great Academic Environment. I’m thankful to all of them & our college to bestow the best in my life ever.”

(BCA- Batch 2005-2008)
Presently pursuing MCA at N.I.E.,Mysore
Role of M.S. Ramaiah in moulding my life and career

M.S. Ramaiah, one of the premier institutes of India offering varied and wide stream of education happens to be my alma-mater. It’s a great privilege to be a part of such an honoured and renowned institute. I completed my bachelor in business management and it was a great experience and I cherish each and every moment spent there. It helped me in reaching where I am today. Even today its name lingers in my every moment. The management and faculty had been extremely helpful and cooperative and I am sure that I would never get such support in any walk of my life. I wish the very best of luck to the institute and the students in the coming future.

Sumana Goswamy

(BBM- Batch 2004-2007) Presently pursuing MBA from Mount Carmel college

Role of MSRCASC in moulding my life and career

I am Tarun Kumar Singh, 2005-08 batch student. I joined this college in 2005 for BBM. On the first day in college I was really terrified, fearing of what will happen, and will I be able to cope in this college or not. Everything was new for me, new faces, new people. I came here with all dreams and hopes to make my life better and to achieve what I dreamed of. And today I am happy to say that I did well in all the 3 years of my stay here.

I made new friends here, did all those of mischievous things which a college student think off. bunked classes, argued with the teachers for no reason just for fun. I was known in my class as the most naughtiest guy and who always thinks of how to disturb class. I still remember sir’s shouting on me and Dhanalakshmi ma’am’s making me out of the class. But the teachers here helped a lot in my studies, suresh sir’s extra classes on phones, Dhanalakshmi ma’am’s ideas were of very help to me in my MBA. I didn’t find any problem in doing my MBA because I had already studied that in my graduation. They helped me in every sort they can. I was really lucky to be here and to study in their guidance, all of them guided us in right way inspite of what we guys did.

I really miss them now, I wish them that may god give them good health, good life and fulfill their all wishes.
I wish my juniors all the best for their future.

Tarun Kumar Singh

(BBM- Batch 2005-2008) Presently pursuing MBA from VIT Vellore

Role Of M.S.Ramaiah College in fostering my career

I was yet another another adolescent, out of school, when I stepped into my first college scared as hell. But my first day turned out to be a delight. We had a formal introduction from one of our lecturers who welcomed us to our endeavor and I also got to meet my classmates, some very formal and some of them finest - who am friends with even now.

I was part of the PUC Commerce Section, and here I met some of the most influential teachers of my life. I was particularly impressed at the same time terrified of my Accounts Professor, Mr Jayram (HOD of Commerce Dept) who had a very extraordinary style of
teaching. He was a delight and everybody in the class looked forward to his lectures and his pleasant chatter. He was very motivating and took a lot of pride in his students’ accomplishments. Our Kannada classes were quiet a contrast from our Accounts classes Mahalakshamamma and Balamma had a very disciplined approach towards teaching. Mrs. Roopa, Radika and Kavitha provided me an unwavering support in my studies. Their immense dedication towards students was commendable. Mrs Sunitha and Kavitha Yadav were very pleasant and friendly teachers. After completing PUC, I went on to pursue BCom. I was never very ambitious and never thought I would continue my studies after graduation, but thanks to my teachers’ support I am pursuing my MCom. Kudos to all my teachers. All of them taught me a lot, more than that, taught me right. I really hope I will be as good a teacher when I become one. I would like to take this opportunity to thank all my teachers who have helped me design my career, I don’t want to celebrate so early, as I still have a lot to accomplish. Destiny is not a matter of chance, its a matter of choice: it is not to be waited for, it is a thing to be achieved.

S. Malashree
(B.COM –Batch (2006-2009) (Presently pursuing MBA)

My Experience in M.S.Ramaiah college

M.S. Ramaiah has provided me with the priceless gift of best education and training. Every passing day since graduation from M.S. Ramaiah, has led to a greater appreciation of the excellent facilities and teaching at this highly reputed institution which truly match up with the best standards. Apart from coursework, M.S.Ramaiah provided me with plenty of opportunities to participate in parallel academic and cultural activities and to acquire leadership roles which culminated in my all round personality development. The encouragement and continuous support from the faculty has helped me attain success and live my dreams. Pursuing a career in Commerce and Chartered Accountancy, I strongly believe that the benefits of studying at M.S.Ramaiah cannot be overemphasized. I am proud to be a part of the M.S. Ramaiah family.

(B.COM –Batch (2005-2008) (Presently pursuing MBA)

Role of MSRCASC in moulding my(your) life and career

MS Ramaiah Art, Science & Commerce College - a Roller coaster of ups and downs Live life to the Fullest. 365 days in a year, only 365?, i wish i could make the count 563 and live some more footloose and fancy-free days in college, the word “college” itself vibrates me with vivid thoughts but at the same time going back to relive those moments locks up me in nostalgia and sometimes in tears too, for my revered college cannot be swapped with anything else on this planet MS Ramaiah Art, Science & Commerce College has been a composite blend of life, i learnt to live a colorful life and make every day and every moment a cherished one, emotions like, happiness, cheerfulness and smiles had always been bestowed on me

Memories like having an ice-gola in the scorching heat of 45 degrees, the junk food lined up outside my college, the optimism on my friends place to have fun, liveliness and exuberance reflected from every moment we spent on college

The way in which you grow up, mature, and find out who you really are, is something you can’t accomplish without going to college. My college was a transition for me which gave me a ‘grown-up’ tag along with the courage to think what is the worth of my life and individuality.

Inspired by the word “balance” which is also the key towards a successful life i have always tried to multitask, trying to experiment on something new at very stage of my life, the college instilled in me the
ability to think towards achieving the same, on a personal front the college helped me to refine my persona to become a better human being.

We are always engrossed in our lives and unknowingly tend to ignore the society, but besides having an impact on my life MS Ramaiah inculcated social values which reminds me the bare minimum I should contribute to the society so that we look ahead for a better future.
