PRINCIPAL'S MESSAGE

I am happy to learn that many of you who are graduated from this great temple of learning will be back for the reunion. This is your college and alumni meet is an ideal platform to reconnect with each other as also with your illustrious teachers. We as Ramaiah College of Arts, Science and Commerce (RCASC) certainly look forward for your meaningful contribution from the alumni to the Alma mater including sharing your valuable and professional expertise with the present students, contribute to the nation building through knowledgeable, efficient and upright citizens who have imbibed right values during your tenure at RCASC.

I look forward to meet each one of you on 10th March 2018.

Dr. A. Nagarathna
Professor and Principal

CONVENER MESSAGE

College takes pride in conducting Alumni Meet for the 9th consecutive year and releasing the 10th edition of annual alumni magazine 'Alumni News Letter 2018'.

It gives us immense pleasure to conduct reunion of our students. The overwhelming response for the meet has been encouraging over the years and we wish to look forward for continuous association and support.

We would like to inform happily that the Alumni Association of RCASC is undergoing with the

process of registration. Hence, online registration is provided to alumni students through the website: www.msrtcasc.edu.in. All alumni students can also register through alumni@msrtcasc.edu.in. Our sincere thanks for the continuous support from the management, principal, staff, students and alumni in bringing out this edition.

Mrs. Roopa H. S
Convener of Alumni Committee.

Inception of my College days - A remembrance

Stepping into a post high school graduation has never been easy, specially when I hail from a steel town named Durgapur from West Bengal. Initial days were full of anticipation of a new life a new beginning. The first days in Bangalore and college were something which I would always cherish. I loved the brand 'Ramaiah College' and I loved the environment. I still remember my father talking to the faculty during my admission and left me with some strict coded instructions about being disciplined. Seldom though we try to be disciplined during our college days as the life throws up all good things our way. We indulge in good acquaintances, make new

friends and start our studies.

That's is when we get to meet our esteem professors and teachers who patiently & diligently guide us through the curriculum

and impart high end knowledge for what the competitive world seeks in the new generation.

We learn year after year and groom but forget to thank the pioneers who set the stage for us to take on the world.

Years after passing out with an experience of several years in corporate looking back to those good old times we would always cherish our good times we had along with the blessed acquaintances we had with our teachers. A step and bow to them for their contributions

Struggle Makes You Stronger

Yes I am back with my experience of life Reader Just take a moment and think have u ever imagined your life without struggle.....Here comes one big question mark right ? Imagine if you got what you want, every time.

No Struggle.

No Hard Work.

No Challenges.

Some of you may be thinking WOW ... That would be great... but beleive me You would be weak!

And then, when something hard comes up in your life, you wouldn't know how to handle it, because you have never gone through anything that strengthens you.and that time your strength capacity will be challenged and that time u will be clueless .No one can grow without strugle u just google about any personality I AM SURE u will get to know how they struggled in their life to be a famous personality rather than just a human being .You were given this LIFE because you are strong enough to live it so don't you give up.You have a purpose in this world.And you will only find it if you keep going and keep GROWING.Strength Grows Out Of Struggle and your successes are based on how well you overcome your struggles in life.

Struggle is a clever device through which nature compels humanity, which includes you to develop, expand and progress. Be honest with yourself, become as transparent as crystal clear water and you will soon find your struggles turning into one success after the other. As a human being, you will face many struggles along the way, many of you will not succeed due to ignoring the tools around you which can help you, by not choosing a mentor to help you and by your own inability to embrace your own struggles head on and let nothing and no one get in your way. Always remember in your life who you are tomorrow begins with what you do today so stay positive work hard, and make it happen

PUT YOUR HEART, MIND, AND SOUL INTO EVEN YOUR SMALLEST ACTS AND TASTE THE FRUITS OF SUCCESS.

THANK YOU,

Lakshman Sinha Lucky

MBA (Batch 2012 to 2014)

Currently Working at VIA.COM As a E Commerce Specialist

Calligraphy, the art of beautiful handwriting. The term may derive from the Greek words for "beauty" (kallos) and "to write" (graphein).

Calligraphy is an exacting craft, demanding historical knowledge, a highly developed aesthetic sensibility

In calligraphy, paper, ink, brush, ink stone, paperweight, and a desk pad are used.

There are several styles, including Western, Eastern Asian, Southern Asian, and Islamic. All calligraphy uses the same basic principals to create beautiful lettering..

The East Asian tradition of calligraphy originated and developed in China. The countries that use East Asian calligraphy are China, Japan, Korea and Vietnam.

The dynasties of the Qin (221-206 BCE) and Han (206 BCE-220 CE) represent a crucial era in the history of Chinese calligraphy. On one hand, diverse forms of brushed and engraved "ancient writing" and "large seal" scripts were unified into a standard type known as "small seal (小篆)." On the other hand, the process of abbreviating and adapting seal script to form a new one known as "clerical (隸書)" (emerging previously in the Eastern Zhou dynasty) was finalized, thereby creating a universal script in the Han dynasty.

Why it was so important,

Before there were PCs to do our composition for us, individuals relied upon writing by hand. For

formal writings and significant pieces, many individuals depend on calligraphy, which was a type of excellent and fancy hand-writing.

Calligraphy has been utilized since antiquated circumstances, and numerous human advancements joined it into their writings.

Over the years, trends changed.

once anyone with a halfway reasonable education could write a fair hand. The first blow was the typewriter. Then schools stopped teaching traditional cursive, because it was too hard. And now computers, printers, emails and text messages have rendered the whole business more or less redundant. Hardly anyone writes anything meaningful by hand any more.

Shalini B V,

Taxassociate, KPMG

I didn't know that the happiest moment of my life happened during my college life in which made me realized a lot of things about school life.

At first I thought it would just be a normal life and I did not expect something happened in disguise. I thought I'll continue to hide in my beehive, but it seems that the happenings made me alive!

So, I thank those people who made my college life complete. The friends in which I can say, brings out the real me, the family in which completes my family tree, and the teachers who saw the best in me.

College life was a lot of fun, though problems come as fast as the cheetah runs, but its what motivates me to do the best I can and brought me to the end of my college life.

My Journey THOSE DAYS

I belong to a small village named honaganahalli in kolar district of Karnataka. My college days are unforgettable and in fact those days are happy days in my life. Every student has those days in their lives as well. I enjoyed myself a lot when I was in ramaiah .College. I have learned a lot from my professors. When ever i was wrong they corrected me. They used to be very friendly with us. They were very supportive and encouraged us in all things to grow up in our lives.

Whatever I am today I give all credit to the Teachers from whom I learnt to live a life worth life. I cannot forget my teachers Dr .Pushpa H Head of the department, microbiology and Dr Snehalatha assistant professor department of microbiology.

I couldn't possibly just pick one faculty member who has made the biggest impression on me.

Our teachers have many roles in our lives. Some have a traditional teaching role - from our preschool experiences to our postgraduate experiences. Others may have other roles: parent, relative, neighbor, youth leader, friend, sibling, and others. What they all have in common is the ability to have a meaningful, and sometimes profound, influence on our lives and the directions our lives take. Interestingly, this influence most often comes from who they are rather than what they teach.

“My two years in Ramaiah College of arts, science and commerce. Especially department of microbiology were one of my best experiences I ever had. It gave me exposure to various extra-curricular activities along with great academics. It provided all the facilities and encouragement needed to attain high in life. Looking back, I can see my department was extremely important and a stepping stone in my career. It allowed me to develop my interpersonal skills, which are extremely important in any field of work.”

There are two important days in a person's life. One is the day on which you are born and the other you learn 'why?' But when you get the answer to the 'why question' put all your heart to achieve it, and you will.

As rightly said by Dr. A.P.J. Abdul Kalama, “difficulties in your life do not come to destroy you, but to help you realize your hidden potentials and power, let difficulties know that you too are difficult”.

The most important thing which i learned in

R a m a i a h
College is how
to be self
disciplined

“ B e i n g
disciplined
does not mean
l i v i n g a
restrictive life
style, nor does
it mean giving
up everything you enjoy, or to relinquish fun and relaxation;

“Self- discipline allows you to reach your goals in a reasonable time frame and to live a more orderly satisfying life”

How to become self discipline

Developing self discipline is not an overnight process, take one step at a time and begin by making the decision to go forward and learning what it takes to get there

There is a powerful 10- step formula that you can use to set and achieve your goals for the rest of your life

- Decide what you want
- Write it down
- Set a deadline
- Make a list
- Organize your list
- Take action
- Do something everyday
- Practice self- denial
- Get inspiration
- Visualize the rewards.

Self discipline allows you to reach your goals in a reasonable time frame and to live a more orderly and satisfying life
When you master self discipline, you;

- take control of your time an life completely which helps you to accomplish the things which are most important for achieving your goals
- get going and keep going ,no matter what
- overcome procrastination for good
- focus on your most valuable activities
- Develop courage and persistence in every area of your life so you get what you want.

We aren't born with self discipline, it's a learned behavior so work on building yourself discipline though daily diligence...

There's no question that teachers can have an incredible impact on the lives of their students. Great teachers can spark inspiration, confidence, and instill values that last a lifetime, well beyond the confines of a classroom.

My professors have always been supportive and guiding me in the right direction. My parents, family and friends really supported me in the tough times and always encouraged me to pursue this dream. I owe this to them.

College" is a land mark in the journey of one's life. We will enter in to the college with a tender feel and come out with matured feel.

This institution has given us unforgettable impressions. Those occasional class bunks, canteen gossips, late night studies and, life mantras from teachers and countless other memories are about to stay in our minds forever. Fests organizations and extra-curricular activities organized by the college increased our exposure and made us confident and helped us a lot in striving and becoming what we are today.

The wide range of tasks performed by us has given us a sense of responsibility towards our society and raised our conscience. Not only has this institution given us a tremendous learning experience, but also given us a chance to participate in various social and cultural events. Leaving aside the non scholastic activities, the lessons taught by our proficient professors have given us indispensable knowledge and guidance throughout our session. I am grateful to my teachers and professors for all their efforts to make us better persons support us throughout our college journey.

MSc(MB) - 2015-2017

"You don't always need a plan. Sometimes you just need to breathe, trust, let go and see what happens" - Mandy Hale

I realised this now, but back then, when I had just completed my Bachelors, I wasn't calm at all. I had panic attacks as soon as my exams came to an end. But after approaching my mentors, they had suggested me to take sometime, think about your likes and dislikes, based on that decide. After a lot of thinking, I knew that I definitely didn't want to change my field, because I realised the passion for Biochemistry. So, later on my mentors told me to go for MSc. Biochemistry as it had a wide scope of career opportunities. Finally one day I visited M.S. Ramaiah college of arts, science and commerce and enquired about fee structures and necessary details. Without much ado I had decided that I will be pursuing at this reputed institute.

I still remember the first day of my Masters. We were asked to assemble near the Biochemistry laboratory. Firstly, Prof. Chennarayappa gave a brief introduction about the college and the department, followed by Dr. Vasanth Kumar

Bhaskara who got us familiarised with the course. The next day we met our seniors, who had eventually guided us throughout the course like our elder siblings. After just few days of the start, there were cultural events being organised and we had to participate in the various events. We had a discussion about this in the staff room with Krutika mam

and Manjurani mam, this was the first time I had approached Manju mam. As there were less number of students, compared to other departments, the department of Organic Chemistry and Biochemistry was like a big family, which had parent - like teaching staff and the students were like the eager - children. Also, the supporting staff, Puttu Sir and Shyamamma, cared about us immensely, though we troubled them for very little things.

Prof. Chennarayappa taught us only in the first semester, but never failed to ask how we did our exams, appreciated when we did something good and even scolded us when we scored less in any of our tests. Manjurani mam made the

metabolism classes interesting and helped us remember all the complex cycles. Pooja mam and Priyanka mam, though were with us for a short period of time, they gave us exposure to various subjects of Biochemistry. One of the guest lecturers, Prof. Balasubramanian who had played a significant role in shaping us and preparing us for the future. His way of teaching using videos impressed us. Prof. Rajdurai played role of a friend who guided us through the practicals and discussed a number of calculations. This article and the words will not be sufficient to show my heart felt gratitude to Dr. Vasanth Kumar Bhaskara. From day one, till the last day of the college he had been our mentor, who had gone out of the way to make things easy for us. Even after college he has been in constant touch and helped to start my career. Whenever we got lost in our way, Vasanth sir was right behind us guiding us through the right path. He was the main reason that we could complete this two years course successfully.

Our dearest Principal, Prof. Nagarathna, motivated us constantly. The professors of other departments like Microbiology, Biotechnology and Genetics were very approachable. We could approach them for any kind of help, they never failed to help us. There are so many names that I

couldn't pen down, but all together this college had provided us with a homely environment and I feel proud to mention that I was a part of this renowned institute.

Like a roller coaster ride there were ups and downs in these years and you can't expect life to be a straight road. The best thing to do is let go off these things, learn from one's mistakes and move ahead with a positive attitude. Nobody knows what is in store for us, but our job is to work hard towards our aim and leave the results to fate. Some people get good jobs soon after graduation, but for some others it may take a while. We should be a little patient as it isn't easy for life science students to succeed. We should believe in ourselves, never loose hope that good things will happen and let things fall in line. Everything will happen at its own pace, life has plans for us, knowingly or unknowingly we will reach our goals, because that's how destiny works. Just be positive and don't let the negative vibes hold you behind.

"Remember no one can make you feel inferior without yourself consent" - Eleanor Roosevelt

Swapna Keeliputti

Msc (Bio-Chem) -2015-2017

Education

How our life built from the benefit of education and excels to generate productive minds. Matter of fact is that, through education we are more likely to produce leaders in various areas of our lives as well as leading others. While in the Indian scenario we would see the emphasis is on the education and educating others. There is downside to it too.

The emphasis on leadership and education is to educating leaders and empowering them. This would enhance their abilities and sharpen their skills. A profound statement is truly said by Pastor Bill Hybels, "Everyone Wins When a Leader Gets Better".

As a student we are guided by our teachers. They could be our parents, school and college educators, and elders of our societies, etc. One true enigma is to understand the knowledge and wisdom and the wise variance between them. While we learn to gain a lot of knowledge but the wisdom part is more from parents or loved ones.

In the process of progress when we are maturing to take wise decisions, sometimes wrong choices may torment our career or delays our upbringing. Here I would like to say, from my past experience you need to get your strings attached to the experienced ones in the field and receive good counseling as well.

Being out there in the world of competitions, we are likely losing focus, but the facts remains the same. We have to remain standing on our strengths while pushing the borders to level up high. In the big stages like college we must make goals and paths clear to our future and not just enjoying the stay. This intern saves our post college life and time as well as helps us achieve our dreams. While waiting sometime would frustrate you too. But staying at the right track and having guidance help us rising in our career to achieve desired goals.

Subimal Banerjee

MSc - 2012-2014

(Researcher and Educator)

AND THEN RAMAIAH HAPPENED TO ME ...

(two years of life at Ramaiah)

It was my life away from home...

College was very much a paradox for me. College was the most challenging experiences in my life, and yet one of the best experiences I ever had.

My first couple of weeks at Ramaiah was rough and really made me test my strength (mental and physical). I can remember missing the first hour classes as it was truly challenging for me to wake up early in the morning, massive assignment submission in the very first week of college was no less than a task.

And eventually things started going good, I found that there is a great difference between UG and PG. It's a place where we need to be a little more mature than how we were, it's a place where we create a bigger foundation of our life and it's a place where we find and create ourselves. "ATTENDANCE", the only reason why students attend lectures, but NO, here in Ramaiah I really came across some of the best lecturers, DrPushpa H, HOD of Microbiology dept was my favorite. It was my UG lecturer who made Microbiology a very interesting subject for me, but then DrPushpa was the one who made me fall in love with "micro-organisms". The way she taught, encouraged and guided us on project in spite of not keeping well was praiseworthy.

Coming to the most important part of my college life, "MY CRAZY BUNCH OF FRIENDS". When you're away from your family, your friends become your most important support network. These are the people you turn to on campus when something goes wrong but also when something goes right. My small little gang of five (with Amu, Basi, Varsha and Vin) made me laugh little louder, smile little brighter and live a little better. College life without them was like a plain bread, nothing could make it special. Whenever I thought I was the only one who did not study for the internals or class test, they always had my back. But no matter what, we helped each other during our final exams and surprisingly all of us came out with good marks as well (though we weren't that surprised as our teachers).

Now that it's all over, I miss the naps taken in-between the classes, passing messages in chits, sharing food, the culturals, last minute photocopies of friend's notes or WhatsApp pics of the notes, wandering around college, stalking people, exam pressure and group studies, classroom masti, canteen food, driving together with friends, bunks, pranks, GOSSIPING etc.,

No place however beautiful, can replace college.

No beautiful sounds can replace the chit chatting and laughter.

No better place than college.

My two years in RAMAIAH happened to be the BEST.

Anoosha. S

Msc (MB) -2015 -2017

A New Chapter: College

I began My College career at MS Ramaiah College of Arts, Science & Commerce in 2011. I have overcome many obstacles on the journey to obtaining a University degree. This journey has been one of the most important in my life, and my time spent studying at MS Ramaiah College of Arts, Science & Commerce has been both Rewarding and eye opening Experience. Over the course of my time at MSRCASC, I have gained knowledge as well as the skills necessary to become successful outside the academic environment. I have not only grown as a person, but I have also acquired the foundation for furthering my formal education and the tools I will need to shape my career. My education in

field of Commerce has provided the grounding required to synthesize and analyze information, solve problems that involve critical thinking, and gain a deep appreciation for the humanities. However, most importantly, my education has been fueled with ethical evaluation that would forever change my outlook on life.

These were some of the best years of our lives and my college (MSRCASC) had huge role in making us a responsible, mature, educated young adults to face the world.

Mohammed Usaid Kadli

Bachelor of Commerce (B.Com)
Batch (2011-2014)

Myself Yashwanth. B ex-student of MSRCASC as I graduated in this institution 2012-2015 batch.

I heartily consider privilege myself to be kind, honest, humble and empathetic. To be honest, I am one among those people who seek trust in every one and I'm easily influenced over it. I'm a trustworthy guy and the secrets and promises shared among my friends and family are always intact.

Firstly I was a stubborn student and moreover I was considered as an annoying irritating and arrogant student by almost all the teachers both my school grades and my college grades. To say the truth I always liked the bad path and was never interested in studying. As said "Each person meets their magical teacher who changes one's path of education".

Looking above to the context, the teacher (guru) who changed my path was "Sri Jayaram sir". who is the faculty of MSRCASC. He taught me the basics of my, improved my personality and the way I look upon things. Moreover all my ambitions, desire and responsibility were transformed to a well versed personality under the guidance of "Sri Jayaram sir". Hats off to you sir.

See, being such a sick child earlier, I can't believe myself I've developed working hard, studying as others. I had never tried anything but Jayaram sir believed in me and now I'm one of the ought to being an successful graduate. Its never too late, don't deny upon oneself, first believe in yourself and try "Everything is possible". It is true that I am pursuing my post graduation MBA in RIMS college right now... This Ramiah institution made my life colourfull. Thank you

Yashwanth. B

BCom -2012-2015

It is my pleasure to learn in this recognized institution. I feel proud to be a commerce student for the three years B.com course. All the teachers and Jayaram sir supported me a lot in each and every stage with their guidance which helped me to score high marks in every semester and encouraged me to take part in co-curricular activities of commerce department and college events.

At last I thank commerce department faculties for kind hearted support and encouragement to pursue higher studies. Thank you.

Sudhindra Bhat

B. Com - 2014-17

FRIENDS !

Scientific face: if you make a Million a year and your friends make Rs. 5,00,000 a year then you are happy. If you make a million a year and all of your friends make more than 2 million a year then you are miserable. There's a ton of studies. Search Engines are really great at finding them.

Your friends support you and love you until maybe one or two of them don't when you have a vision that breaks out of the comfort zone you have created with your friends, some people will ALWAYS be unhappy.

Does not matter what they were like before then, they cannot even help themselves. They will try to keep you down. Get back to the first step: AWARENESS.

When you have a Vision that changes the world, focus on that part. Not on what your friends think. I have seen it happen too many times. They will stop being your friends the second you see something they don't or can't.

Have friends who can speak of your flaws on your face and your Good behind your back.

Swathi G.R

B.Com 2014-2017

HOW TO WIN OVER ANGER !

Where there is anger, there is usually pain underneath. Anger is a self-gratifying emotion we adopt so as to avoid uncomfortable feeling like losing control, confusion, fear and sadness.

The more anger you hold in your heart towards the past, the less capable you are of happiness in the present. As Jennifer Edwards put it, "The beauty of life is that while we cannot undo what is done, we can see it, understand it, and learn from it and change. So that every new moment is spent not in regret, guilt, frustration or anger, but in wisdom, understanding, and love."

Sometimes you don't realize the weight of something you have been carrying until you feel the weight of its release. Anger is like that. Holding on to anger is like grasping a hot coal with the intent of throwing it at someone else; you are the one who gets burned said Lord Buddha, how true, let us win over our anger and help ourselves in spreading happiness in this world.

Swathi G. R

B.Com 2014-17

THE EMPLOYEE IS THE KING!!

Gone are the days where organizations believed employer to be the king, nowadays “employee is the king” of a successful organization.

Industrial Relations is of utmost importance to provide a conducive environment in the present competitive market scenario. Rapid changes and improvements in technology affect the retention of competent manpower especially that of the younger generation. “Adapt to changes” pose a great challenge playing a prominent role amongst today’s employees.

According to the recent study, the organizations are focusing on integration of human resources and creation of an atmosphere of self-involvement to make functioning more conducive. This makes the role and functions of managers more sensitive, agile and innovative.

This results to 69% (as of 2017) of the companies being actively taking steps to improve the way they look into the people data, compared to only 10-15% before. If managers are able to effectively analyze and predict the needs of the employees accurately, this will lead the organizations to become efficient, effective and successful.

The increasing emphasis on employee management and employee engagement has led to the strong foundation for progress in the HR landscape like:

- Shift from Employee Engagement to “Employee Experience”

Integration of engagement, culture and performance management.

- Race to digitalize HR

Social media

Mobile technology

Bringing your own device (BYOD)

The Cloud technology

Cyber Security

- People Analytics entering organization structures

The people analytics team would be responsible for developing models and dashboards that will bridge communication gaps between team leaders and senior management. Governance teams will be erected to ensure the security, coordination and privacy of employee data.

- The ‘Gig Economy’ redefining the workplace

The BCC defines the Gig economy as, “a labor market characterized by the prevalence of short term contracts or freelance work, as opposed to permanent jobs.”

Having flexible work provisions will drive a firm’s employer value proposition, expand the candidate talent pool and is great way of retaining highly valued employees.

Along with the other practices, all these recent trends point to having a better workplace and the companies will have new challenges in making this possible, These practices will result in identifying the right candidate resources, providing them with monetary and fringe benefits, understanding their needs and alignment of organizational goal with that of employee’s personal goals, creating a sense of ownership towards the organization, etc. they are likely to be rewarded by higher productivity, greater employee loyalty, employee involvement and employee retention. It is noteworthy that in the present times it is the employee and not the employer who is the King!

Rashmi L

BBA 2013-2016

Cricket is my passion

Cricket! It always gives me a pleasant smile. Cricket is not a game but a religion. My relationship with cricket and personal goals is always a win-win relationship. I would rather compromise on other unwanted things which all the other group of youngsters would waste their time in. I started my career in cricket during my school days where the love towards it grew so much deep that I would love to take it as my career as well. I don't see cricket just as a game which we would play on the grounds on particular days and win or lose but it has changed my life to setting goals in life and making strategic plans to having a healthy relationship with the fellow mates. I would also like to thank RCASC for giving me right opportunities to represent my college showcasing my talent.

I would always tell myself to keep calm and love cricket, sigh! I still remember a day when I had a match against HCA during my under graduation course and my parents had given a surprise visit to see me playing and I was unaware but once I hit a straight six which stroke straight reaching them, I was overwhelmed seeing both of them feeling proud by seeing me play that made me so happy and motivated me so much that it lead me

to finish the game by taking man of the match award, Yaay! Those days are treasured.

Much to tell about my captaincy, I'm sure I have set an example and motivated all my team mates not just to dismiss the play after the innings but to congratulate and retain the relationship of the winning or losing team, I know we have to learn a lot from the game. Every other match I played has given me an immense pleasure and special memory to carry with. Well, nevertheless I have played for nationals, been to Mumbai, Chennai, Vishakapatnam, as a captain I have represented Ramaiah college in all India cricket Tournament By Bangalore University and have brought in many laurels.

Cricket is an emotion to me, all I would like to say as a cricket player is love your game be it any game which you would like to play for fun as well as to learn, each individual interest may vary but take any sport in your life that will make u a better person with fitness and good health to live and be sportive where u emerge as a good leader and as a great personality. Ending with what I started- cricket is my passion and I am also a black belt in Karate and my guru is my father-my pride!

HEALTH AND FITNESS

Health and fitness is the state of being healthy, both, physically and mentally. We can define Health as the state of complete mental, physical and social well-being of a person and Fitness of any person as the ability to meet demands of the environment.

There are various ways we can keep ourselves healthy and fit if we follow regularly the following:

- We should regularly involve in the daily physical exercises by getting some time from our much hectic schedule. 30 to 60 minutes of exercise on daily basis or five to six times a week is ideal for anybody to remain fit.
- Healthy and clean food in right amount and at right time is very necessary for a person to stay healthy and fit. Healthy nutrition with high-fibre, low-fat, high protein, and rich source of vitamins and minerals is the key to good health.

- In order to get fit and healthy, good sleeping pattern is very necessary for any person. We need to maintain a discipline in our daily routine and focus on good sleeping pattern which must start and end at right time. Taking quality sleep of eight hours each night boosts our immune system and helps in preventing cardiovascular diseases as well as improves mood. Inadequate sleeping pattern leads to the sleep disorders and various mental disorders.

Health and fitness is very important for people who want to live a healthy life very happily and peacefully. A healthy and fit person is only capable to live life to its fullest extent. We can say a person healthy and fit if he/she is physically and mentally fit. Physically and mentally fit people become less prone to the medical conditions.

Health and fitness of any person helps in:

- Decreases the risk of diseases (high blood

pressure, diabetes, coronary heart diseases, colon cancer, osteoporosis, obesity, stroke, breast cancer, etc).

- Improves their confidence level.
- Heals injuries soon.
- Helps to live longer by adding years to the life.
- Reduces stress, anxiety level, feelings of depression and improves the quality of life.

I conclude this article by saying “Regular physical activities and routine exercise is very necessary for the people of all age group especially younger generations. Put an end to all unhealthy habits (Smoking, Drinking, etc) and start fresh. Health and fitness brings happiness in the life and helps a person to live stress free and disease free life.” “HEALTH IS WEALTH”

A Letter to my teachers, as a student and colleague

Dear Teachers,

I've been trying to write this for two days. I keep writing and erasing, writing and erasing. Because the truth is, I can't find enough words of gratitude for what it is you do for all of us on a daily basis.

I started to think back to my own years of schooling and all of the amazing educators I was fortunate enough to have. Every single one of you were brilliant, even those that I didn't care for, especially the ones I didn't care for because I probably learned the most from you.

Your patience, your dedication, your passion. It all resonated with me. I remember your names, your faces, your messages, your encouragement, your wisdom, your individual skill sets, your special qualities that made you unique, your ability to remember our names 10 to 20 years later, your ability to show up for us.

You set me up for success to brave this world. You paved the way for me and all of your students, because that's what you signed up to do.

You chose your career on sheer selflessness. You chose it on passion. You chose it based on the love for children. The love to educate our youth and to make them better. We are all keenly aware that you didn't choose this path based on the financial reward.

You spend your own money on supplies; you have very little free time in the evenings and on

weekends. You spend those hours grading papers, answering parents, emails and texts, planning, conferencing, organizing, thinking, crafting.

In the most violent time in history, and you, dear teachers, are raising a child right along with the parents, carrying burdens that the parents cannot fathom.

You spend more time with the children on a daily basis than the parents do during the course of the week. You know them better than the parents do in some aspects. You have tasks so large that the parents cannot reconcile in their minds as to how you manage not only the personalities of 15-60 students, but of their parents too.

So much stress, so much worry, so much anxiety, so much thought process that already goes into your daily grind. I cannot imagine how this all feels to you right now.

I know we can do better together and we will but in the meantime, teachers...thank you.

Thank you for showing up.

I will never have enough words of gratitude and thankfulness.

You are true heroes. My words will never fill that statement with enough power.

BCA

Three years in Ramaiah has been a privilege, the amount of experience I've had here is truly overwhelming, from making new friends and building a faithful relationship with our teachers to seeing myself do things that I thought were beyond my potential, it has really been an amazing journey where I watched myself learn and grow and these three years in Ramaiah shall be my fondest memory for many years to come.

M U Muthanna
BCA -2014-2017

College days are the best days in one's life they say and three years in MSRASC just proved it to be true.

I still remember the first day I walked into my classroom, my first day of BCA, 80 new faces and a teacher by the board teaching "C". I was clueless and lost and everything possible but today I have a thousand memories in that same college which I cherish, which brings a smile on my face each time I think about it.

I must admit to the fact that my lecturers did play an important role to mold me and all my batch mates to make us whatever we are today. It all began with discipline and punctuality. Making sure that we weren't late to class, if our uniform was intact with IDs on and got into the details of educating us and mastering our course, but at the end all of them just put in their best to prepare us for the future that back then we were clueless about.

I just want to say a huge THANK YOU to all my teachers for guiding me on those tiny steps to success.

MS Ramaiah College Of Arts Science and Commerce gave the exposure to make a decision of what we want in life and taught us to face the real world with confidence. From education to sports and extracurricular activities, everything was open to all of us to explore the talent in us. And finally placements which came to us at the end of 3 years and told "Hey! It's time to get real".

How can I not talk about friends when I speak

about college? They just made it more emotional when it was time for us to leave. It just feels like 3 years weren't enough and I probably want to be stuck in a time loop for those 3 years of my life only because of my friends who made it the best for

me. Attending classes every day, looking at the time to see when our break was or probably catch up on a movie. To finishing assignments, trying so hard to maintain 75% attendance, working on projects and finally studying, only at the last minute still hoping we score good marks in exams. Post which we told ourselves that the next exam we would study way in advance and not hush up at the end and that's how 6 semesters was done.

I miss those days and I wish I could go back to it. I'd like to thank all my lecturers. I am not going to mention names but they know who they are. I have immense respect and gratitude towards all of them for going that extra mile only to see us do well in life.

At last I want to thank this esteemed institution for bringing out the best version of myself.

Priyanka B S
BCA -2014-2017

It gives me immense pleasure to cherish my Experience at MSRCASC,

MSRCASC made a big impression on my life, Without education, there is no independence because you have cornered yourself into a hole, and you will never be able to do what you want to do. If you do not get education all doors close. I consider My self fortunate enough to have been studied in MSRCASC.

I developed a passion for education and great work ethic from my lecturers, My Passion to see the world was fostered at MSRCASC, It was a journey which has enhanced my personality and groomed me at many phases. Meanwhile this journey i felt Love, care, guidance and lots more. I was rewarded the Academic Excellence award and Best Outgoing Student Award for batch 2014 and this has urged me to perform better in everything I do.

My Sincere and heartfelt thanks to all the Lecturers of Biotechnology and Genetics department for all the love and Support Provided to me throughout my time in MSRCASC.

Padma Shree K

(B.Sc Genetics, 2011-2014)

FBA Investigation Specialist-AMAZON

My Memory

Request for penning down memories is very tempting. Toughest part is self imposed restriction for keeping it short. Graduating from the M. S. Ramaiah College of Arts, Science

& Commerce in 2013, there were a number of reasons why I enjoyed my time at college so much. The close attention given to me by staff made it feel like I was never lost amongst the rest of the students and I always felt very comfortable approaching staff. My course has given me the skills and knowledge across the broad base of Biotechnology, while also allowing me to customise my degree so that I could study those subjects I was most interested in, like Microbiology. I learnt a great deal about communicating with a range of people, and gained confidence and experience as an independent individual.

As for the immediate future, I'm determined to

continue to build on budding career.

I'd like to continue to gain a higher level of expertise in depth of Science, and to forge a career that takes me places and gives me many different experiences.

'The friendly 'smallness' of the campus that MSRCASC offers is great, I miss College activities that I handled.

Sports day use to be fun , I was lucky as I was from a very strong team of Bsc whether its, cricket or Carom anything.

I believe you should be technically strong on whatever u learn in college as it matters in the professional life. Keep an attitude positive one " Harsha Bhogle says - 70 % of Talent and 100 % of attitude makes you a gr8 Manager , but 100% talent and no positive attitude may end u up no where"

Had very good experience at college, wish to get back that days back.

A very best to all of you. And Keep Smiling.

Shashank. S. Sarma

BSc 2010-2013

Happiness is Remembering College days

College days fills maximum colours to life journey in the form of lessons.No matter where I am always I miss my college campus,lovable teacher,dearest friends and numerous.Those were sweet memories that I miss throughout my life.I had ma best three years of journey in Ramaiah.

The first day when i stepped in it was like i am in a new world,new teachers, new friends, new campus everything was new.But as the days passed i was very much happy.The teaching was excellent our teachers supported us very much in studies.They were very friendly to us which made us comfortable.They even supported in activities which was held in and out of the campus they guided us to their full.Their words inspired us in avhieving something.The fest in the college is so memorable that even today i feel

that coming back to Ramaiah.Each and every day i have made many memorable moments which makes me recall them again and again.I miss my teachers and especially one of ma favourite teacher Pratibha Mam I miss u so much.Because of ma teacher guidelines i have taken prizes in power point presentation and poster making where i learnt new things which helps do it more better the next time thankyou for that.I got a dearest friends who loves me very much.Well lastly all i wanted to say is i had my beautiful journey in my college all because of my lovable teachers and good friends i miss my college.Thankyou for giving me an oppurtunity to share my experience an making my memories cherrishable.

BSc 2014-2017

(presently pursuing MSc in biotechnology in Bangalore University)

THE JACKS OF ALL TRADES

It was my first day at college and I was asked why I chose BA, after realizing that I was a student from Science Background. I would tell them how much I loved the combination of the subjects and how much excited I was to explore my course and curriculum. I think its high time that we need to break the stereotype that looks down upon BA and labels BA to be a loser's choice all the time. I think that BA, especially JEP, at least for me is very special. Its a combination of three Vivid subjects. I equally loved Journalism, English and psychology. These subjects are bound to expand your thought spectrum and give you a very unique perspective about your life and world around you. However, I ended up Bunking classes and I regret doing it a lot. And I, firmly believe that there is a need for change in the way we are being taught as well.

I guess this is one among the very few courses that each core subject offers you an entirely different career. And that's what I liked a lot about this course. Today, when I look back, I feel that choosing BA was one of the best things I have ever done in my life. Firstly, it offered me a

different career that other courses would have not. Whether you start the course with a choice or in a confused state of mind, it has something in the store for everyone. You could be Investigative Journalist, busting the secrets behind biggest of the crimes. Or you could be a therapist healing people's mental ailments or a passionate Teacher spreading the love of literature to your students. Or could be an entrepreneur. These are just to name a few, there is an ocean of opportunities waiting to be explored.

Above all the academic excellence, there are many things to be learnt to get ready for the

journey in the real world outside. And I believe that, only the right attitude can take you to the places you want to go. Drop all your beliefs and start afresh. Be flexible. Read more, learn more. The more you learn the more you are empowered. Vision and Knowledge are the things that draw a distinction between a leader and the rest. Remember that all your emotions and feelings are your energies. The more you keep your emotions in harmony the more harmony you feel around yourself. Remember that all your happiness and miseries are

outcomes of your decisions and you have all the ability to choose and access what you want. What you think is what you become. And there are many Neuroscience Researches that prove the statement. The mind creates your reality and you have all the capabilities to control your mind.

Remember, the one who can conquer the self can conquer the world.

TIME MACHINE; TAKE ME BACK TO MY UG LIFE!

A girl with stage fear and not so confident climbed the steps of Ramaiah college and believe me, that was the end of her low self-esteem mode in life, this is Apeksha S from the batch of 2014-17 who pursued her under graduation in BA Journalism, Psychology and Optional English and surprisingly she remembers her register number (14kua81005) too :P.

After my PU I was in a dilemma as to what to take up next and I found my interest which is media and Ramaiah was my first choice. I was initially very shy and reserved but after my first semester I really opened myself and participated in many activities including cultural, sports, academics and the awards that I got boosted up my confidence to a great extent. My teachers were more like friends who were my backbone for these three years as they encouraged me in every step and I owe them everything I have achieved till date. I have experienced almost

everything from getting screwed for my mistakes to hosting fests to excelling in academics. I am currently pursuing my PG at Christ University but I miss everything about this college now, the

peaceful classes, imposition for coming late to class, the unforgettable fests, festival celebrations, IT canteen, our department and the list goes on...if I ever get a chance to get back in time I would choose to go back to my UG life. I dreamt of becoming a successful journalist and thanks to Ramaiah College for letting me follow my dream and for helping me become the confident "me".
