

Disability Friendly Campus – Ramps and Lifts facilities

All institutions of higher education are legally required to accommodate students with disabilities. This friendliness extends to all aspects of the college MS Ramaiah College of Arts, Science and commerce has a Disabled-Friendly teaching-learning environment, and infrastructure. The building caters to students with all kinds of disabilities. There are four physically challenged students studying in the college. Out of these four students, three of them are restricted to wheel chairs.

Disability Friendly Infrastructure: The building is wisely designed to help physically challenged students. It has ramp to facilitate people on Mobility Scooter / Wheelchair to easily enter and exit the building. This ramp has the capability to help serve all types of wheelchairs, regardless of the size. It also bears all types of weights of the Mobility Scooter / Wheelchair. It is reliable and has a smooth platform. The building is installed with five lifts, three in the 'D' block used by Degree college staff and students, and two in the 'A' block.

One of the lifts in the 'D' block is for staff and connects from the parking lot to different floors of the building. The students who use Mobility Scooter / Wheelchair face the difficulty of climbing stairs since they are seated on the Mobility Scooter / Wheelchair.

These ramps/lifts facilitate specially challenged students/staff to reach their classroom/staff room. These facilities help them to live an independent life without the necessity of a caretaker to move in and out every time. Students do not find any difficulty in attending any of the classes in any of the floors as they will have to attend language classes or any noncore subject classes in the assigned class rooms at different floors/levels. These facilities make the students who are mobility impaired to be practical, safe and secured on the campus. The students and their parents extremely happy and have opined that the building has an excellent infrastructure for their easy mobility in the building.
