Event report on Value Added Program-SAP

Event: Value Added Program

Academic Coordinator: Dr. Shaista Banu Harris

Title of the Program: SAP(FICO)

Date: 03.05.2023

Time: 9:30 am

Brief about the Program:

Value-added courses are designed to enhance the standard of the students beyond the levels specified in the academic curriculum. The **objective of this program** is to enhance the employability of the students and help in building skill sets and bridge the gap between the curriculum and the industry's requirements.

They also help them learn the interdisciplinary skills required to survive and thrive in the corporates.

SAP offers a variety of software packages for enterprise technologists, much of it in the enterprise resource planning (ERP) space. Many large companies, esp Multinational Companies, demand that their developers have at least some familiarity with SAP's software. This establishes that SAP training is essential as a necessary skill set.

Students need the training to master the complexities of SAP; during the job interview process, hiring managers and recruiters will expect the students to have some basic knowledge of it. The industry might test knowledge via technical questions during the interview process, so it is always advisable to add this new-age skill set to the kitty of our students.

Royal Tech Head Academy took the program for our 3rd Semester students for 30 hours. The syllabus included Accounting documents, Concepts on general ledger, accounts receivable, automatic payment program, etc.

In a nutshell, it was beneficial for the students to undergo this value-added program. The learning objectives were achieved by the end of the completion of the program.

Students building their skillset on SAP
