World Hepatitis Day - 2022

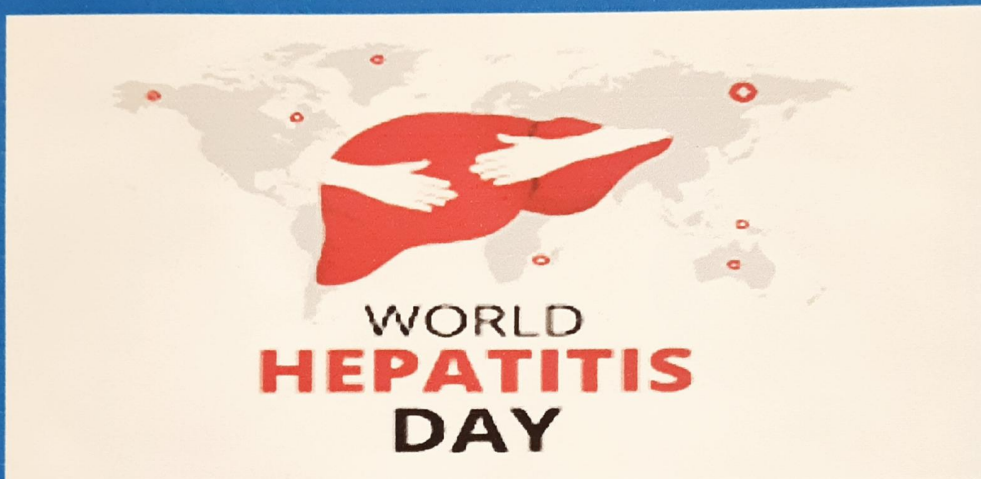

An awareness program on hepatitis

Organized by

Department of Microbiology

28 July 2022

Objectives: To create awareness about the Hepatitis infection and its control as a part of health and hygiene.

Event Co-ordinators:

Dr. Prasanna Srinivas
Associate Professor,
Department of Microbiology,
Contact Number: 9880126506

Dr. Yogesh D
Assistant Professor,
Department of Microbiology
Contact Number: 9964566500

Dr. Ramesha A
Assistant Professor,
Department of Microbiology
Contact Number: 9900804204

About the College:

Dr. M S Ramaiah, a visionary and philanthropist established "Gokula Education Foundation (GEF)", in the year 1962, to deliver education and healthcare for the betterment of mankind. Under the tutelage of GEF, Ramaiah College of Arts, Science and Commerce (RCASC) was established in 1994. RCASC is Re-accredited with "A" Grade by NAAC, Permanently affiliated to Bengaluru City University (BCU), and approved by AICTE. It is also recognized under section 2 (f) & 12(B) of the UGC Act 1956. It has produced several rank holders and has alumni in distinguished institutions all over the world. The College has a legacy of organizing National Conferences and workshops in various disciplines of Science, Commerce and Management in addition to Quality Initiatives in Higher Education.

Department of Microbiology

The Department of Microbiology, established in the year 1999, offers both undergraduate and postgraduate courses. The faculty of the department are highly qualified with experience and expertise in various domains of Microbiology. The department has very good infrastructural facilities to carry out teaching and research activities. The theory and practical classes lay emphasis on 'problem based learning', knowledge content, utility value, application in real life, latest developments etc. The department is undertaking research projects in the major thrust areas of microbiology and attracted funds from various agencies. Also, the faculty of the department carry out multi-disciplinary research programs, encourage students to carryout in-house research projects, present papers, publish their research work and to participate in co-curricular and extra-curricular activities.

About the program

World Hepatitis Day takes places every year on 28 July to raise awareness and promote global action on viral hepatitis.

Hepatitis is an inflammation of the liver. There are five main types of the hepatitis virus – A, B, C, D and E. Hepatitis B and C lead to chronic disease in hundreds of millions of people globally, and together are the most common cause of liver cirrhosis, liver cancer and viral hepatitis-related deaths.

As of 2019, an estimated 116 million people in the Western Pacific are living with hepatitis B and 10 million with hepatitis C. While there are evidence-based, effective and safe interventions to diagnose, treat, and prevent chronic hepatitis B and C, most people remain undiagnosed and untreated. In the Western Pacific, only 18% of people living with hepatitis B have been diagnosed and 5% have received treatment. For hepatitis C, 25% of people have been diagnosed and 10% have received treatment.

Bringing hepatitis care closer to you

This year's theme, "Bringing hepatitis care closer to you", aims to raise awareness about the need to simplify and bring hepatitis care to primary health facilities, community-based venues and locations beyond hospital sites, so that care is closer to communities and people wherever they are.

The new Global Health Sector Strategies on, respectively, HIV, viral hepatitis and sexually transmitted infections for the period 2022-2030 emphasizes the importance of person-centered care and alignment of systems and integration of services to reach the goal of elimination by 2030. To achieve hepatitis elimination at least 60% of people living with hepatitis B and C must be diagnosed and at least 50% eligible for treatment must be cured (hepatitis C) or receiving treatment (hepatitis B) by 2025.

For this to happen, those in need must have access to hepatitis services that are accessible, and that are equitable, effective, efficient, timely and of an acceptable quality.

5 actions to protect yourself against hepatitis:

1. Use sterile injections always
2. Use your own razors and blades
3. Practice safe sex
4. Use safe tattooing and piercing equipment
5. Vaccinate infants against Hepatitis B

In this regard Ramaiah College of Arts, Science and Commerce is keen in creating awareness and has organized an awareness program for degree students school with posters and talk presentation by the UG Microbiology students.

Report on
Extension activity
on
“AWARENESS ON HEPATITIS”

Objectives: To create awareness about the Hepatitis infection and its control as a part of health and hygiene.

Venue: M.S.Ramaiah College of Arts, Science and Commerce, Bengaluru, Karnataka

Date of conduction: July 30, 2022

No. of Participants:- 200 students. The 2nd Semester B.Sc students gave an awareness to the BBA and MBA students.

The Department of Microbiology conducted an extension activity in association with NCC & NSS students on 30th July 2022. The event was to educate the students and the non teachingstaffs about the Hepatitis infection. The Under graduate students and few Post graduate students of Microbiology with the NSS students were involved in preparation of posters to help the people in understanding the effect of Hepatitis virus.

The event was conducted at the Department of Management - the BBA and MBA. About 20 participants including students and staffs took part in the awareness programme by displaying the posters about the Hepatitis infection, medication, control and types of Hepatitis. importance of health and hygiene.

On the occasion of “World Hepatitis Day”- July 27, this extension activity helped in creating awareness on Hepatitis infection and its control. The main emphasis was on the health and hygiene in food and environment. The students were counselled upon the vaccine preparation to develop a better immunity and resistance power.

Students and staffs explained the public with the placards how important it is to maintain cleanliness in public, personal and private.

Outcome of the Activity:

Hepatitis is one of the prevalent infection which spreads through contaminated food and water. The program aims at giving an awareness about the Hepatitis infection, liver cirrhosis and Liver cancer - as a public health issue. This programme rendered the students with the knowledge of hepatitis infection and its control.
