07.08.2023

CIRCULAR

As a part of green environment, considering the adverse effects of plastics on health and considered as pollutant in the environment, we decided to enforce a ban on the use of plastics at the college campus with an immediate effect.

The instructions have been given to all the staff members and the students to avoid the usage of plastics. With the initiative of elimination of plastic cups and plates banned the plastics which is a non-degradable material even in grand events viz., graduation and annual days and also during higher officials' visits to the institution.

CIRCULAR

With a concern over climate change, pollution and congestion, there is a dire need to implement the policies to promote cycling. Bicycles are considered as one of the eco-friendly means of transport as they don't cause pollution.

To reduce the dependency on motorized vehicles and reduce the pollution, all the students and staff members are hereby informed to use the BICYCLES as a primary mode of transport.
