Final Year Project

Synopsis

BCA 6th Semester

FLIGHT RESERVATION

Objective of the project

General Objective:

The main goal of the proposed system is to make the process of airline reservation online.

Specific Objectives:

- To create a system that makes booking and cancelling easy and user friendly.
- Make the entire process of itinerary decisions On-The-Go.
- To provide the customer more options like last minute emergency booking, low-cost chartered flights etc.
- Reduce the work load of ticket officers and counters.
- To enable bulk amount of booking and cancellations in a very short time.
- Instant refund of payments

Scope of the project:

The system provides an online interface where users can search for specific flights from any source to destination. The user can view flight timings, book and cancel tickets. There are several features offered in this system that sets it apart from the many existing systems, such as allowing booking till the last minute as emergency services.

Purpose of the project:

The purpose of this document is to describe the requirements that are necessary for developing the Airline Reservation System. It also helps to gather and analyse the new ideas incorporated to the existing reservation system. The intended audience is any person who wants to view, book or cancel air tickets
