Circular

Department of Chemistry/Biochemistry

The Department of Chemistry and Biochemistry is organizing a Career Guidance Programme on "Career Opportunities in Chemistry and Biochemistry for Undergraduate Students." by Dr.Basavarajaiah S M, Assistant Professor and Coordinator, Dept. Of Chemistry (PG), Vijaya college, RV Road, Bengaluru on 13/9/24 under the DBT star college scheme. All the III and V Sem B.Sc. students are requested to attend the program.

Note: -Attendance is mandatory for all the students

Time: 2:30-3:30PM

Venue: Kuvempu Seminar Hall

Respected Madam

Sub: - Requisition for permission to organize a Career Guidance Programme.

With reference to the above subject, the Department of Chemistry and Biochemistry is planning to organize a Career Guidance Programme on "Career Opportunities in Chemistry and Biochemistry for Undergraduate Students." on 13/9/24 for B.Sc. students under the DBT star college scheme. We are seeking your kind permission to organize the event.

Thanking you

Speaker DR Basavargaiah SM

DEPARTMENT OF CHEMISTRY AND BIOCHEMISTRY REPORT ON CAREER GUIDANCE PROGRAMME

Date: -13/9/24

Number of participants: -82

Event coordinators: - Mrs. Malini. M.R

Objective: - The programme aims to provide the students with an insight into the versatility of career opportunities in chemistry and biochemistry- research and development, and their applications in the fields of pharmaceuticals, environmental science, biotechnology, and education.

Chemistry and biochemistry act as a foundation that plays a critical role in solving global challenges ranging from healthcare and environmental protection to the development of technology and the utility of energy. An undergraduate student, aspiring to specialize in these fields, is provided with versatile career opportunities. A combination of theoretical knowledge and practical skills, helps students to pursue careers in a broad set of areas-research, industry, healthcare, education, and government.

The experience, gained from the exposure to such career opportunities, makes students, the forefront runners in the present-day competitive world. In this regard, the Department of Chemistry and Biochemistry had organised a career guidance programme on "Career Opportunities in Chemistry and Biochemistry for Undergraduate Students" on 13/9/24 under the DBT Star College scheme. The programme was conducted for the B.Sc students and the programme was attended by 82 participants.

The resource person for the program was Dr.Basavarajaiah S M, Assistant Professor and Coordinator, Dept. Of Chemistry (PG), Vijaya College, RV Road, Bengaluru. He emphasized the various career opportunities available for undergraduate students with college degrees in Chemistry and Biochemistry. Based on personal interests and skills, graduates can choose to work in research, industry, healthcare, education, or consultation, with the possibility of further specialization through their post-graduate and doctoral studies. Each path offers exciting and impactful opportunities to contribute to science, technology, and society.

He shared his views about the importance of Research and development (R&D) and mentioned that it is a primary career path for chemistry and biochemistry graduates, particularly for those interested in discovering new substances, understanding complex biological processes, or creating novel materials.

The session was very informative. The discussion, on career opportunities in Chemistry and Biochemistry, was of great benefit to the students. The participants were enlightened about the various career opportunities available in chemistry and Biochemistry. This ultimately, motivates students and enables them to obtain placement opportunities.

There was an interactive 'Question and Answer' session, which followed the presentation. The programme was concluded with a proposal of the Vote of Thanks.

We are grateful to the Principal and the Management for giving us this opportunity.

Outcome:- Students gained a clear understanding of the various career opportunities available in chemistry and biochemistry- research, healthcare, industry, forensics, environmental science, and education.
